REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance. The prior art fails to disclose a lighting element having the following features:

1) a receiver sleeve having a tail section at one end thereof, the receiver sleeve being electrically and thermally conductive, the tail section being received around the output end of the lighting element, making electrical and thermal contact with the first electrical contact *on the circuit board* to provide both a thermally conductive path to dissipate heat from the lighting element and an electrically conductive path to the first electrical contact as recited in claims 1 and 9; and

2) a receiver sleeve having a first end and a second end, a substantially planar end wall at the first end, an aperture in the end wall and a tail portion extending from the end wall concentric to the aperture, wherein the output end of the lighting element is substantially entirely on the exterior side of the plane of the end wall as recited in claim 12.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
